DESIGN & ENGINEERING

AESTHETIC SPECIFICATION

The flexible nature of the Pilkington Profilit™ system renders it an ideal material for inclusion in both exterior and interior designs.

- Horizontal or vertical panels.
- Straight or curved configuration.
- Standard perimeter frame or bespoke design.
- Facades, cladding, brise soleil, walls, partitions, bars or desking.

- Panel lengths up to 7 metres.
- Options in light transmission and privacy.
- Excellent daylighting properties.
- Colour coatings.
- Partial sandblasting effects.

AESTHETIC SPECIFICATION

Pilkington Profilit™ is available in two main ranges; **standard and low iron**. The low iron glass has a 'white' or 'colour neutral' appearance while the standard product range has a natural 'green' tint. Both are available in a variety of finishes including **clear, cast, sandblasted, amethyst and slimline** and in various panel widths and thicknesses.

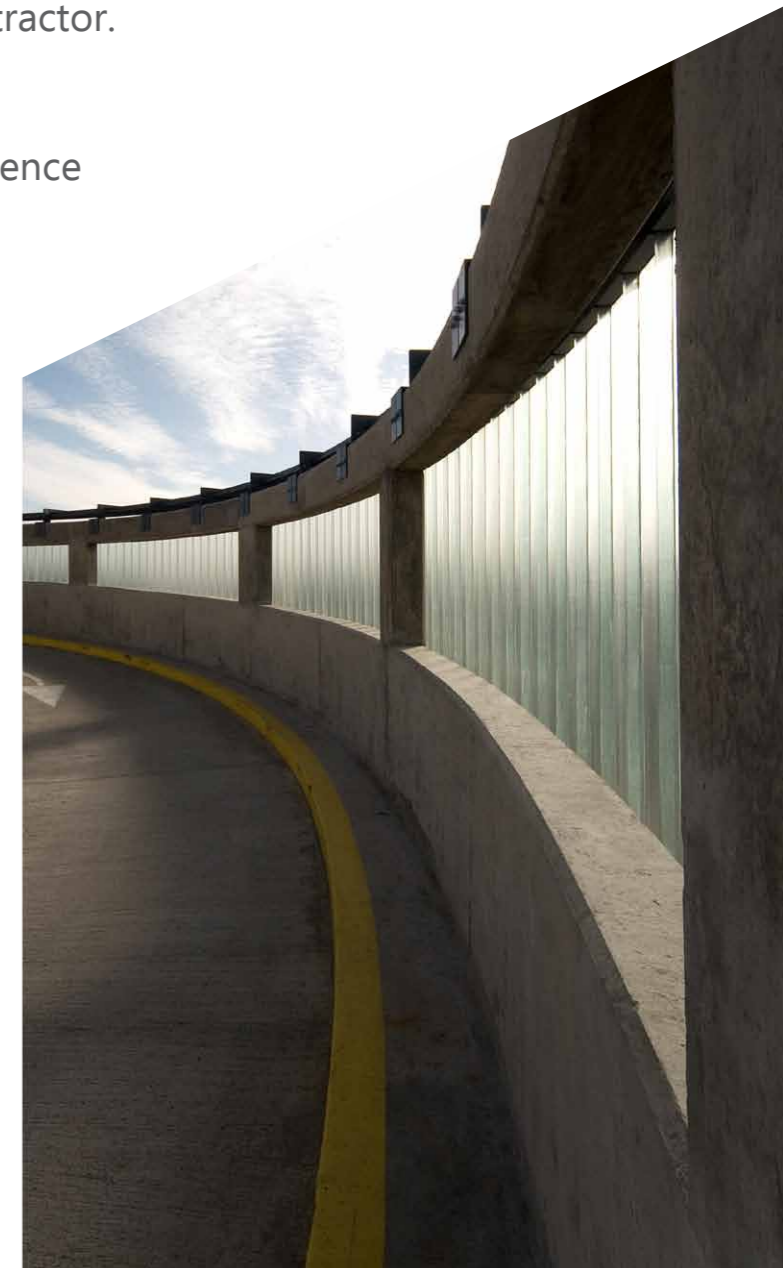

TECHNICAL SUPPORT

Topglass has a passion and deep appreciation for **all glass products** and our understanding of its material properties has been built over **twenty plus years** as a specialist glazing contractor.

It is this wide ranging industry experience that gives us the edge when finding **innovative solutions** to perceived design constraints.

TECHNICAL SUPPORT

Contact us directly for advice on;

- Specialist Applications.
- Loadings.
- Structural Movement.
- Coatings
- Insulation
- Toughening
- Filming
- Curved Radius
- Longitudinal Wiring

Within our dedicated Profilit™ team, our technical department has unparalleled knowledge on specifications, building standards, regulations and performance figures.

DRAWING SERVICES

Our drawing department provides an [Auto CAD](#) service to fulfil design requirements and assist in realising your project vision.

DRAWING SERVICES

We have a reputation for producing **non-standard configurations** which are acknowledge as having achieved feats of engineering and artistry combined.

Our design experts have a wide breadth of experience having designed projects throughout Ireland, the UK and Europe.

OPERATIONS & CONSTRUCTION

SUPPLY & STOCK

Topglass operations are based out of our considerable warehouse and showroom. These facilities allow large quantities of glass to be stocked off site prior to commencement of works as well as a quick turnaround for shipment to site.

This site also benefits from glass processing facilities enabling a quicker turnaround on bespoke products such as custom sandblast designs or coloured glass products.

SUPPLY & STOCK

Our honest, inclusive and mutually respectful approach has earned us well established and long standing supply chain relationships. We have cultivated a robust partnership with glass manufacturer Pilkington and with all our suppliers.

EXPERTISE

Our teams are experienced in the [specialist installation](#) of the Profilit™ range and have other transferable skills honed while working with a variety of glass products. This gives them a wide grasp on various installation techniques and an industry pedigree.

EXPERTISE

Site supervisors and installation teams are [CSCS approved](#) and undergo all relevant training. We believe training is key to [quality](#) and the continual improvement of our employees is crucial to our success.

INSTALLATION

The modular nature of the Pilkington Profilit™ system makes for a smooth installation process. Glass (unless toughened) can be cut to exact size both on and off site. Our installation operatives are well versed in the best practices when cutting our specialist products, ensuring that small adjustments can be made and delays are avoided.

INSTALLATION

Multiple site teams and resources allow us a flexibility and the ability to keep to tight programmes.

If breakage of panels does occur and replacements are required it is possible to replace affected panels with **little disruption**, maintenance of the system when in situ is minimal.
